

10 Indoor Water Saving Tips

1. **Turn it Off.** Turn off the faucet while brushing teeth or shaving, you can save about three gallons of water a minute.
2. **Cut it Short.** A five-minute shower or under can save you about 30 gallons of water a day.
3. **Upgrade Old Toilets.** Replace your toilet with a WaterSense® labeled toilet.
4. **Upgrade Appliances.** Replace older washing machines and dishwashers with water-efficient models.
5. **Wash Full Loads Only.** Wash full loads of clothes and dishes in the washer, the average American household uses about 23% of its water in these washers.
6. **Install a High-Efficiency Showerhead and Faucet Aerator.** You could save about one gallon per minute.
7. **Fix It.** Check for leaks and fix them as soon as possible.
8. **Save the Rinse.** Don't rinse the dishes before putting them in the dishwasher, this can use as much water as the dishwasher.
9. **Keep an Eye On It.** Monitor your water bill for unusually high use. A high water bill could mean there is a leak.

10. Mellow Out. If it's yellow let it mellow and if it's brown flush it down.
