2019 Phone System RFP Addendum B

These are additional clarification questions as presented by potential respondents to the RFP.

1. Are the analog lines for the fax machines terminated locally at each location, or are they home run back to a central closet such as the MDF at City Hall?

a. There are no analog lines within any building.

2. Would it be possible/acceptable to use a SIP Analog Terminal Adapter (ATA) to convert the connection to the fax machines from analog to IP?

a. utilization of a SIP analog terminal adapter (ATA) is the preferred method to deliver analog to the Fax terminals, and is what is utilized by the current phone system.
