

Pg3,sec3.0 – It shows 16 sites but on the Exhibit A network drawing it only shows 10 locations? Can you list number of physical locations and the departments at each physical location and confirm how many physical locations with separate addresses there are in this network? We are trying to determine how many survivable gateways are needed. If you could provide addresses for each location that would be helpful also.

See updated Exhibit A.

Will the requested wireless handsets/phones be tethered with a desk phone or will they be standalone extensions needing their own voicemail?

The requested wireless handsets/phones will not be tethered to a desk phone and will require standalone extensions needing their own voicemail.

Pg4, sec5.0 - The City has requested a minimum of 200 voicemail boxes, does this consist of a vmail for each ip phone plus 85 mailbox only users (115 ip sets, 85 mailbox only users)?

The 200 Voicemail boxes requirement consists of 1 voicemail for each IP phone plus 85 mailbox only extensions for future use and department level voicemails.

Does the City of Alamosa need Active directory integration?

The City of Alamosa prefers Active directory integration, but is not a requirement of this RFP.

Does the City of Alamosa need the capability for Instant Messaging?

The City of Alamosa does not require the capability for Instant Messaging.

Does the City of Alamosa need the capability to schedule conf calls (meet me conferencing)?

The City of Alamosa does not require the capability to utilize meet me conferencing, however each phone must have the ability to conference several lines together.

Updated Exhibit A.
