Tuesday January 26, 2021
Downtown Parklets Installation

The City will be installing six parklets on Thursday and Friday January 28th-29th in Downtown Main Street in an effort to extend outdoor dining due to COVID-19. While it is an odd time of year to install the outdoor parklets, due to grant requirements and manufacturing delays, the effort will begin this Thursday!

Thankfully, the parklets will be in place once the weather begins to warm up so that restaurants and bars will be able to supplement their indoor dining. Placement of the parklets closes out phase one of the Main Street project. Phase two will occur later this year with the reduction of the three lanes on Main Street down to two lanes. The City is hopeful to begin the lane reduction phase in May, 2021.

These projects would not be possible without the support of key partners CDOT, SLVCOG, DOLA and CHFA.
