**Alamosa Lift Station Construction**

Alamosa, CO - Beginning this week, local construction crews will be replacing the sanitary sewer lift station at First Street and Alamosa Avenue.

Due to the shallowness of the water table, crews have to run dewatering pumps for the next 3 to 4 days before they can begin the work. These pumps have to run 24-hours per day, which will create some noise that crews will do their best to mitigate.

Once this dewatering has been completed, crews will begin the underground work. This work will not close any streets or impact water or sewer services. It is anticipated that the work will be completed by the end of April.
